Profile

With over 15 years of experience in language services, I have gained a deep appreciation for the nuances of cross-cultural communication. As the founder of WiTIS Language, I have had the privilege of building a vibrant network of over 250 language professionals worldwide, fostering collaboration and continuous growth within our community. In my previous role as a Language Team Coordinator for The Immigration Projects, I was entrusted with negotiating rates with LSPs and linguists and managing translators and interpreters, ensuring that project goals were met within budgetary consideration. This experience has not only refined my project management skills, it also reinforced my commitment to delivering high-quality, culturally sensitive language services that bridge gaps and foster understanding.
